AIR CARGO SECURITY

The aim of this course is to ensure full compliance with the international regulations (ICAO, EASA, etc) as well with the National Authorities.

The main objective is to ensure that staff can apply a standardized level of preventive security measures and understand the need to apply these measures to the security of goods and mail. Also, drivers involved in the transport of cargo / postal items, on-board and airport supplies can apply security measures to them.

By the end of the course, the participants will be able to apply the security procedures imposed by the legislation in the field and to use them in the operational activity.
