

EASA Air Operations SPO (Specialised Operations)

Specialized operations (SPO) are represented by any operation other than commercial air transport where the aircraft is used for activities such as photography, surveying, observation and patrol, agriculture, construction, advertisement.

The Air OPS Training course is designed for operators and organizations in understanding and application of operational requirements for European Operators based on the regulation (EC) No. 965/2012 with AMC & GM material and the basic regulation (EC) 2018/1139.
