

DRONE PILOT

UAS REMOTE PILOT TRAINING FOR OPEN CATEGORIES A1+A3

Confused about the new drone regulations? Not sure what you need to fly for fun or for business?

The Regulation 2019/947 requires that any remote pilot operating an UAS weighing more than 250g is required to undertake an online training course followed by the successful completion of a theoretical examination.

*The **Drone Remote Pilot Training - Open Categories A1+A3** provided by the European Aviation Institute is the training course you need!*

The interactive online training course covers the knowledge required by UAS remote pilot in the areas of air safety, airspace restrictions, aviation regulations, human performance, limitations, operational procedures, UAS general knowledge, privacy and data protection, insurance and security.

Important Note:

After the successful completion of this course, the participant has to pass the related online theoretical knowledge examination at the Romanian Civil Aeronautical Authority.

Course Duration:

You need to plan 1.5 - 2 hours to complete this course

Audience:

Remote pilots wishing to operate in the European UAS Open Category A1 and/or A3

Entry Requirements:

Very good knowledge of English language (training materials are in English)
